DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 13-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gardner et al. (US 6,218,720).

Gardner discloses the steps of:

For claims 23-33:

a nitrogen doped insulating liner (210, fig. 7) grown on sidewall of the shallow trenches;

a gap filling insulating material (214, fig. 9) filling the shallow trenches level with the surface of the semiconductor substrate; and

a plurality transistors (218, fig. 12) is formed in the substrate, wherein said nitrogen doped insulating liner acts as a stop to prevent said impurity species from diffusing into said substrate from said gap filling insulating material

(col. 8, lns. 15–58 and col. 5, lns. 45-50).

Gardner fails to disclose a plurality of trenches. However, it is well known in semiconductor manufacturing to form a mask that patterns more than one trench, therefore it would be obvious to one of ordinary skill in the art to form a plurality of trenches in Gardner. Also, for claims 24-30, a "product by process" claim is directed to the product per se, no matter how actually made, In re Hirao, **190 USPQ 15 at**

17(footnote 3). See also in re Brown, **173 USPQ 685**: In re Luck, **177 USPQ 523**; In re Fessmann, **180 USPQ 324**: In re Avery, **186 USPQ 116** in re Wertheim, **191 USPQ 90** (**209 USPQ 254** does not deal with this issue); and In re Marosi et al, **218 USPQ 289** final product per se which must be determined in a "product by, all of" claim, and not the patentability of the process, and that an old or obvious product, whether claimed in "product by process" claims or not. Note that Applicant has the burden of proof in such cases, as the above case law makes clear. "Even though product-by- process claims are limited by and defined by the process, determination of patentability is based upon the product itself. The patentability of a product does not depend on its method of production. If the product in product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product is made by a different process." In re Thorpe, 227 USPQ 964, 966 (Fed. Cir. 1985)(citations omitted).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
